

## **GC POWDERED-AG+**

*powdered activated carbon for Agricultural Applications*

**GC Powdered AG+** is a virgin carbon derived from selected grades of bituminous coal. It is widely used to cleanse soil which has been contaminated by the over application of herbicides, pesticides or fertilizer.

| <b><u>Specifications</u></b> | <u>AG</u> | <u>AG+</u> |
|------------------------------|-----------|------------|
| Mesh Size, (US Sieve):       |           |            |
| -100 mesh, %:                | 99 (min)  | 99 (min)   |
| -200 mesh, %:                | 95 (min)  | 95 (min)   |
| -325 mesh, %:                | 90 (min)  | 90 (min)   |
| Iodine Number, mg/g:         | 600 (min) | 800 (min)  |
| Ash Content, %:              | 15 (max)  | 15 (max)   |
| Moisture, % (as packaged):   | 5 (max)   | 5 (max)    |

\*Standard packaging is 25 or 500 kg vinyl bags. Other packaging is available upon request.

Caution!

*Wet activated carbon removes oxygen from air causing a severe hazard to workers inside carbon vessels. Confined space/low oxygen procedures should be put in place before any entry is made. Such procedures should comply with all applicable Local, State and Federal guidelines.*
