

GC 8 x 30R

regenerated activated carbon

GC 8x30R is a regenerated carbon which is granular in form. Made from bituminous coal, it is ideal for many liquid phase applications including the removal of organic contaminants from liquid streams. Its size makes it appealing where low pressure drop is needed. It is not recommended for use in the purification of drinking water or other food grade applications.

Specifications

Mesh size – 8 x 30, %:	90 (min)
Less than No. 8, %:	5 (max)
Greater than No. 30, %:	5 (max)
Iodine No., mg/g:	800 (min)
Surface Area, m ² /g:	800 (min)
Moisture, % (as packaged):	5 (max)
Typical Density, lbs./cu.ft.:	28-32
g/cc:	0.45-0.51

*Standard packaging is in 1,000lb vinyl bags. Other packaging is available upon request with an additional cost.

Caution!

Wet activated carbon removes oxygen from air causing a severe hazard to workers inside carbon vessels. Confined space/low oxygen procedures should be put in place before any entry is made. Such procedures should comply with all applicable Local, State and Federal guidelines.
