

## **GC POWDERED**

powdered activated carbon

**GC Powdered** Activated Carbon is a virgin carbon, derived from selected grades of bituminous coal. Its high activity and surface area make it ideal for many applications water and wastewater applications.

### **Specifications**

Mesh Size, (US Sieve):	
-100 mesh, %:	99 (min)
-200 mesh, %	95 (min)
-325 mesh, %	90 (min)
Iodine Number, mg/g:	800 (min)
Surface Area, m <sup>2</sup> /g:	900 (min)
Moisture, % (as packaged):	5 (max)
Typical Density, lbs/ft <sup>3</sup> :	29-33
g/cc:	0.52 - 0.56

\*Standard packaging is in 55# vinyl bags. Other packaging is available upon request.

### **Caution!**

*Wet activated carbon removes oxygen from air causing a severe hazard to workers inside carbon vessels. Confined space/low oxygen procedures should be put in place before any entry is made. Such procedures should comply with all applicable Local, State and Federal guidelines.*
